TTM4205 Secure Cryptographic Implementations

Oppdatert: 5. desember 2023 kl. 13:01

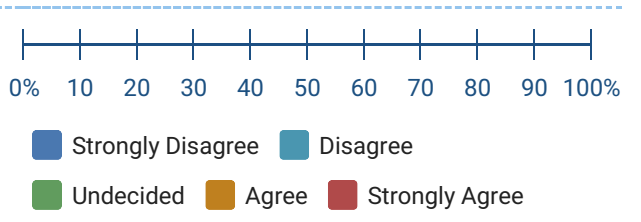
To which degree did you attend the scheduled activities (lectures, exercises, labs,...) of the course?

Antall svar: **9**

Svar	Antall	% av svar	
0 %	0	0%	0%
20 %	0	0%	0%
40 %	1	11.1%	11.1%
60 %	1	11.1%	11.1%
80 %	1	11.1%	11.1%
100 %	6	66.7%	66.7%

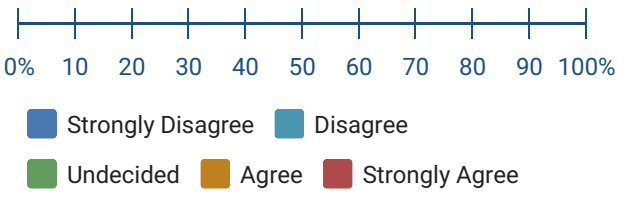
Transferable Skills

Svar	Strongly Disagree	Disagree	Undecided	Agree	Strongly Agree	Diagram
The course has developed my skills in problem solving.				1	8	
The course has developed my ability to work in teams.			3	4	2	



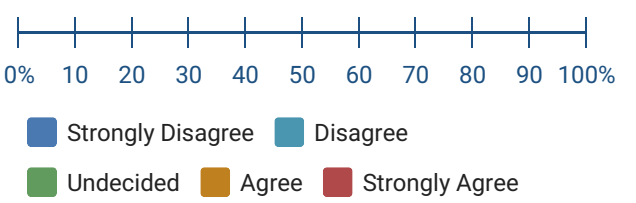
Learning Activities

Svar	Strongly Disagree	Disagree	Undecided	Agree	Strongly Agree	Diagram
There were many good learning activities that required me to work actively (rather than just listen).				1	8	
The learning activities have been well prepared and clearly structured.				3	6	
The learning activities have been engaging and motivating.			1	4	4	
The course required that I prepared for the classes.		2	4	1	2	
There has been a good correspondence between the learning goals and what was asked for in the exam and/or assignments.			1	5	3	



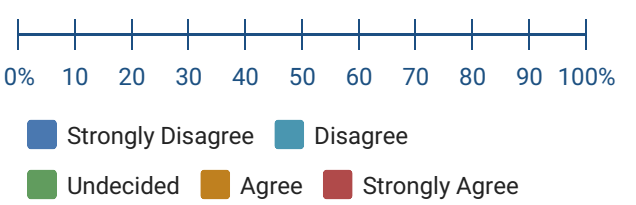
Teachers and Learning Assistants

Svar	Strongly Disagree	Disagree	Undecided	Agree	Strongly Agree	Diagram
Teachers have made an effort to make the subject interesting.					9	
Teachers have been very good at explaining things.				3	6	
Teachers have also tried to understand the challenges one may have with the course and listened to feedback.				2	7	
The learning assistants have given me the type and amount of help I can expect.			1	3	5	



Feedback

Svar	Strongly Disagree	Disagree	Undecided	Agree	Strongly Agree	Diagram
I have received many valuable comments on my submissions / assignments .			6	2	1	
I got answers to the questions I had about the subject in a timely manner, for example directly during class, via email, Blackboard or other channels .			1	3	5	



Requirements and Expectations

Svar	Strongly Disagree	Disagree	Undecided	Agree	Strongly Agree	Diagram
I have mostly had a clear picture of what is required of me in this course .				6	3	It has been clear what quality is expected of my work .			2	4	3	Compulsory assignments and/or exams in the course have had clear assessment criteria .		1	1	5	2	The amount of work required has been too much .		1	3	3	2	The degree of difficulty has been too high .		2	4	2	1	
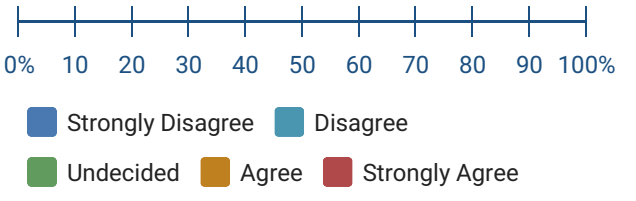
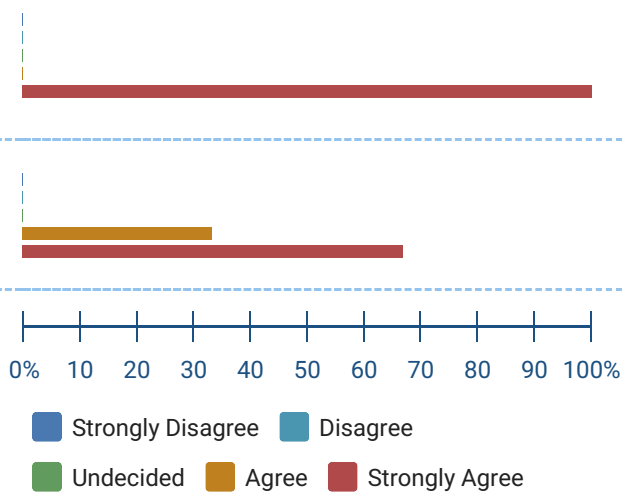
There has been a good match between the prior knowledge I had and what was required of me in the course .			3	5	1	



Overall Evaluation

Spørsmål uten tekst

Svar	Strongly Disagree	Disagree	Undecided	Agree	Strongly Agree	Diagram
The course feels important and relevant for my education .					9	
All in all, I am happy with this course .				3	6	



What do you think was the best thing about this course?

- The variety of topics covered and the different angles considered, alongside the holistic exercises including everything from hardware to crypto.
- The best thing about this course is all the content we have learned. Different topics were discussed during this course and were very interesting.The exercises are sometimes a little difficult but they are challenging so it is good.
- Overall structure and preparation, engagement of lecturer and just the content and how it was presented was of high quality. I can't really tell "the" best thing. I just liked the course, the lecturer, the method of assignments and paper instead of an exam and the relevance in our current world we live in. Keep up the good work! :)
- This course is very interesting thanks to the engagement of the teacher in the preparation of the class and exercises but also during the courses. I learned a lot during this course and it was a pleasure to work in it.
- Very fun topics
- The lectures and learning outcome. Exceptional teacher! Most interesting course this semester!
- The assignments are very practical and useful
- It was very interesting and I have learned incredibly much
- It is really cool to see the dedication and interest our teacher Tjerand has for the topics we cover.

What do you think needs to be improved?

- Since this is the first iteration of the course, the exercise set has yet to properly settle. While the exercises are very interesting and sufficiently challenging, they are also very time consuming, which should be taken into account in the next iterations.
- I think we have a little too much work mostly for the weekly problems. A little less exercise will be great.
- I would have liked for the weekly problems to be discussed each week. Just for maybe 2 min going over them after a new topic and create a connection to what we learned and what the problems are about/some hints or comments on them.
- It may be a little bit hard to know at which pace to work on the exercises because there is quite a lot of it. They are really interesting but it may be a little frustrating to think that we are late even if we spend a lot of time in it.
- Too time consuming work outside of lectures, mostly due to high difficulty
- Weekly assignments
- The weekly problem assignments have been too time-intesive.
- Fewer excerises
- It could have been nice to include a little more prerequisites for some of the hard problems in the Weekly problems in the lectures. Even though this might be difficult considering the many cool and relevant topics we have covered.
